College of Fisheries
Central Agricultural University
Lembucherra, Tripura-799 210

Vol. 1 Issue 1

October, 2014

Quarterly

From Vice Chancellor's Desk

College of Fisheries, CAU, Lembucherra has attracted the attention of all since its inception, for the research work on fish farming systems and demonstration of frontline technologies to aquaculturists of the North Eastern Region. Moreover, the college has been continuously securing good positions in ICAR-JRF and ARS examinations in recent years. I am happy to learn that the College is now coming out with a 'News Letter' to highlight its activities. This attempt is surely praiseworthy.

I sincerely appreciate the endeavour of the Dean Dr P M Pillai and members of the faculty of the College for initiating the publication of an attractive quarterly 'News Letter'. This can incite the spirit of fisheries education in the NER, in addition to providing some useful information to the stakeholders.

I wish this endeavour all success.

S N Puri
Vice Chancellor

Editorial

Dear Friends,

It is my delight to bring out the opening issue of the CoF News Letter. This quarterly News Letter is intended to accentuate the latest developments in academic, research and extension activities of the College of Fisheries, Central Agricultural University. Being a nationally recognized institution situated in North East Region of India, the College has made landmarks in imparting fisheries education and disseminating scientific solutions to the perplexing problems of the fish farmers of the NER. I am confident that this News Letter can be a pulpit for enhanced rapport with sister institutes and stakeholders in fisheries development. The first edition of this News Letter focuses on recent events including ICAR awards to CAU, students performance at national level exams, ongoing research and experiential learning programmes, in addition to the special activities on staff welfare, rural development and livelihood enhancement. Our editorial team will greatly appreciate the feedback from diverse social niches for quality enhancement of the forthcoming issues of this News Letter.
