## **ABOUT THE TRAINING**

A nursery worker plays an important role in assisting in the care of young plants. A nursery worker is someone who works outdoors or in a greenhouse, and whose job it is to plant, grow, water, transplant, prune, and general care for plants, shrubs, and trees. Workers are responsible for maintaining the quality of the greenery under their care, and determine the environmental conditions necessary for optimum

growth and development. They also monitor the whole process from the initial planting to harvest. This training will help the trainees to understand the whole process involved in the nursery management to become a successful nursery worker for future entrepreneurship in nursery industry.

## **FOCUS AREAS**

- Learning different types of tools and implements used in nursery.
- Learning different plant propagation methods.
- To carry out maintenance of nursery.
- To carry out nursery chores.
- Maintain health and safety at work place.

## **SCOPE OF THE TRAINING**

The training programme focuses on all the important aspects of nursery management. After the completion of the programme, the trainees will be able to perform all the nursery operations and start their own venture on nursery. Certificates will be given to all the successful trainees which may help them in future to get absorb in nursery industry.
